

## Services for singers and songwriters.

During my many years engineering and producing in the recording studio it has become very clear to me that there are a lot of people with artist management or production companies who make money from charging their artist over the top for services that are not delivered, or are delivered badly. We have personal experience of cases where we quote a price for a recording service and the manager / producer has added a lot more on to this price for the artist. We have e-mail proof of this behaviour and have pulled out of such deals.

Of course, the majority of management / production companies are not like this but as industry professionals we see a lot more of it than you'd think.

### What we offer

Unlike the people who promise you the earth and put stars in your eyes, we cannot guarantee to make you famous or get you a record contract. But we will use our knowledge and skills to get the best showcase for your talent.

We have our own professional recording studio run by a very experienced music producer and song writer/arranger. We are in contact locally with a team of excellent musicians and we have years of experience in this business. The most important point is that we are honest people who believe you should be getting what you pay for and detest all the ripping off that goes on in our industry.

For a singer it is very important to have a professional recording of you singing modern songs in a genre that best suites you. We can work in indie, soft rock, pop ballad, modern pop, electro and most dance genres.

**So first you need the songs to be written and arranged.** This can be any of the following.

- A song that you have written. We will produce arrange and record this song to a professional standard.

- Totally new songs written and arranged for you to help showcase your singing talent to its best.
- A cover of a commercial song owned by a third party.

### **We then need to record your vocal.**

We believe that the best performance comes from an artist who is stress free, focussed and inspired. With this in mind we give you a producer who understands and has great experience of how to work with a singer to get the best performance. And situated in the mountainous Valencian countryside with the artist's living accommodation right next to the

studio this is the ideal location for chill out. No commuting to industrial estates or airless basements, just nice places to take a breather.

Once we have recorded a great vocal we need to work out and record the harmony / backing vocals. These can be performed by yourself or if you prefer we can bring in a singer for this task. We can give full guidance on this process.

### **Mixing and Mastering.**

Once all the elements needed have been recorded we will use all our years of experience to make sure that you have a creative and professionally finished product. We of course welcome you the artist in helping with creative decisions for the finished production.

We expect and welcome full consultation with you before any time is booked or money changes hands. We need to know exactly what you are looking for and discuss the best way to proceed as every project is unique. So contact us by e-mail or phone to get the ball rolling.
